TASKBOARD

Product Backlog	In Progress	Completed
User Story 1: As a developer, I want to debug Spring Security issues so that the backend can be deployed reliably.	Sprint: Render redeployment Investigate Spring Security configuration Review authentication and protected routes	Record verified fixes and successful deployment only after testing.
User Story 2: As a developer I want to ensure Backend stability and security checks so that the system can be secure		
User Story 3: As a developer I want to Prepare backend for frontend integration so that the system can be connected and work all together	Review authentication and protected routes	Update deployment notes and test outcomes

WALKTHROUGH

1. What do we need to do to advance this piece of work?	This week focused on Render redeployment and debugging Spring Security. The key learning area was checking backend security and deployment behaviour together rather than treating them as unrelated tasks
2. Is anyone working on anything that is not on the board?	No
3. What do we need to finish as a team?	As a team, we need to finalize all backlog updates, ensure that the feedback has been addressed correctly, and complete the remaining user stories for future sprints so that the project remains well planned and organized.
4. Are there any bottlenecks or blockers to the flow of work?	Spring Security configuration and deployment settings may cause problems; record the specific errors observed.

LOGBOOK

Date:		
Mon	1. What did I complete since the last standup?	

	2. What am I planning to complete between	
	now and the next standup?	
	3. What are my impediments (or risks or problems)?	

Date:	13/10/2026	
Tuesday	1. What did I complete since the last standup?	I was doing unit tests for the user entities.
	2. What am I planning to complete between now and the next standup?	I will be investigating the root causes of the errors and issues in Spring Security on the backend side.
	3. What are my impediments (or risks or problems)?	It is difficult to find the root cause of an error in Spring Security when both backend and frontend have been deployed..

Date:	14/10/2026	
Wednesday	1. What did I complete since the last standup?	I will be investigating the root causes of the errors and issues in Spring Security on the backend side.
	2. What am I planning to complete between now and the next standup?	I will be investigating the root causes of the errors and issues in Spring Security on the frontend side
	3. What are my impediments (or risks or problems)?	The specific cause and resolution should be confirmed from the actual logs and test results because we are running out of time.

Date:	15/10/2026	
Thursday	1. What did I complete since the last standup?	I will be investigating the root causes of the errors and issues in Spring Security on the backend side
	2. What am I planning to complete between now and the next standup?	I will be researching multiple strategies that can assist in solving the Spring Security errors and issues that are found on the backend.
	3. What are my impediments (or risks or problems)?	Many approaches can be found when doing such research; the main challenge is tailoring the solution to work for my style of coding.

Date:	16/10/2026	
Friday	1. What did I complete since the last standup?	I will be researching multiple strategies that can assist in solving the Spring Security errors and issues that are found on the backend.
	2. What am I planning to complete between now and the next standup?	I will be researching multiple strategies that can assist in solving the Spring Security errors and issues that are found on the frontend.
